[GitHub](#) [LinkedIn](#) [Portfolio](#)

Skills

Expertise: Javascript, React.js, Node.js, Express.js, MongoDB, Firebase, jwt., HTML5, CSS3, Bootstrap, TailwindCss

Comfortable: Mongoose, MVC pattern

Tools: postman, visual studio code, Github, Figma, netlify, vercel

Projects:

1. Project name: **TV-Shop** (**MERN stack** TV resale website) [live](#) || [client-site](#) || [server-site](#)

- TV-Shop is a TV resale website with an admin panel. Admin can delete users or buyers.
- Users can log in as sellers or buyers. Sellers can Add products and can see all added products in my products.
- buyers can book products and can see all booked products in my orders.

Technology: **Frontend:** React.js, Tailwind CSS, Firebase for authentication, Daisy UI component library.

Backend: Node.js, Express.js

Database: MongoDB

Payment: Stripe

2. Project name: **Fitness Trainer** (**MERN stack** service review website) [live](#) || [client-site](#) || [server-site](#)

- Any logged-in users can add reviews to any service.
- Logged-in users can see my reviews and add services on the navbar. If users are not logged in then the users can't see my reviews and add services options.
- In my reviews, users can edit and delete their reviews. In addservices logged in users can add services.

Technology: **Frontend:** React.js, tailwind CSS, Firebase, Flowbite component library, React-photo view.

Backend: Node.js, Express.js, MongoDB.

2. Project name: **job Preparation** (course selling website) [Live](#) || [Client-site](#) || [Server-site](#)

- I handle authentication systems by using a firebase authentication system for users.
- Users can download the course module in pdf format. The course module will be downloaded dynamically.
- Private route for each checkout page. If users are not logged in then they must log in to go to the checkout page.

Technology: **Frontend:** React.js, ReactBootstrap, Firebase for authentication, React to pdf.

Backend: Node.js, Express.js

Education:
